### Purpose & Authority

This policy implements the Awareness & Training requirement family of NIST SP 800-171 rev. 2 as part of BVTech LLC's security program. It is issued under the authority of the Managing Partner and applies to all employees, contractors, and systems that store, process, or transmit company or client data.

### Policy Statements

- All personnel receive security awareness training at hire and at least annually, covering the risks and the policies applicable to their role.
- Personnel with security-relevant duties (administrators, technicians, finance) receive role-specific training before receiving those duties.
- Training covers recognition and reporting of social engineering, phishing, and insider-threat indicators.
- Training completion is tracked and reported; overdue training suspends privileged access until completed.
- Simulated phishing exercises run at least quarterly; repeat clickers receive targeted remediation training.

### How BVTech Implements This

Delivered through the BVTech Cyber Academy in the OpsPilot portal: monthly refreshed modules, tracked completion, XP/streak incentives, and per-client compliance reporting.

### Roles & Responsibilities

- Managing Partner - owns this policy, approves exceptions in writing, and reviews it annually.
- Technicians and administrators - implement and maintain the controls in the systems they manage.
- All personnel - comply with the statements above and report suspected violations immediately.

## Exceptions & Enforcement

---

Exceptions require a written, time-boxed waiver from the Managing Partner recorded in the risk register. Violations may result in discipline up to termination and, for contractors, termination of engagement. This policy is reviewed annually and upon material change.
