Purpose & Authority

This policy implements the Media Protection requirement family of NIST SP 800-171 rev. 2 as part of BVTech LLC's security program. It is issued under the authority of the Managing Partner and applies to all employees, contractors, and systems that store, process, or transmit company or client data.

Policy Statements

- System media containing sensitive or client data - paper and digital - is protected, and access is limited to authorized users.
- Media is sanitized or destroyed in accordance with NIST SP 800-88 before disposal or release for reuse, and destruction is certified in writing.
- Media containing sensitive data is marked, controlled during transport outside secure areas, and encrypted when carried on portable storage.
- Use of removable media is restricted by policy and technical control; media without an identifiable owner is prohibited.
- Backup media and locations are protected with the same rigor as production data, including encryption at rest.

How BVTech Implements This

Enforced through BitLocker/FileVault on portable devices, USB restrictions via RMM policy, certified destruction (BVT-FRM-263 certificate), and encrypted, access-controlled backup repositories.

Roles & Responsibilities

- Managing Partner - owns this policy, approves exceptions in writing, and reviews it annually.
- Technicians and administrators - implement and maintain the controls in the systems they manage.
- All personnel - comply with the statements above and report suspected violations immediately.

Exceptions & Enforcement

Exceptions require a written, time-boxed waiver from the Managing Partner recorded in the risk register. Violations may result in discipline up to termination and, for contractors, termination of engagement. This policy is reviewed annually and upon material change.
