

NIST 800-171 COMPLIANCE

NIST 800-171 Policy - 3.11 Risk Assessment

Enforceable policy implementing the NIST SP 800-171 rev. 2 'Risk Assessment' family (3.11) across BVTech LLC and, where contracted, managed client environments. Statements below are binding on all personnel.

Document ID	BVT-CMP-111
Version	1.0
Effective date	July 28, 2026
Document owner	Jordan Polasek, Managing Partner
Classification	Internal - BVTech LLC Confidential
Review cycle	Annual, or upon material change

Purpose & Authority

This policy implements the Risk Assessment requirement family of NIST SP 800-171 rev. 2 as part of BVTech LLC's security program. It is issued under the authority of the Managing Partner and applies to all employees, contractors, and systems that store, process, or transmit company or client data.

Policy Statements

- Risk to operations, assets, and individuals arising from system operation is assessed at least annually and upon major change.
- Vulnerability scanning runs on a defined cadence and when new vulnerabilities affecting the environment are identified; results feed the remediation queue.
- Identified vulnerabilities are remediated within timeframes commensurate with risk: critical/exploited within 72 hours, high within 14 days, others within 30 days.

How BVTech Implements This

Driven by Pulse posture scoring, the CISA KEV feed integrated into daily monitoring, RMM patch compliance, and the risk register template (BVT-INT-069).

Roles & Responsibilities

- Managing Partner - owns this policy, approves exceptions in writing, and reviews it annually.
- Technicians and administrators - implement and maintain the controls in the systems they manage.
- All personnel - comply with the statements above and report suspected violations immediately.

Exceptions & Enforcement

Exceptions require a written, time-boxed waiver from the Managing Partner recorded in the risk register. Violations may result in discipline up to termination and, for contractors, termination of engagement. This policy is reviewed annually and upon material change.
