Purpose & Authority

This policy implements the Security Assessment requirement family of NIST SP 800-171 rev. 2 as part of BVTech LLC's security program. It is issued under the authority of the Managing Partner and applies to all employees, contractors, and systems that store, process, or transmit company or client data.

Policy Statements

- Security controls are assessed at least annually to determine they are effective in their application.
- Plans of action (POA&M) are developed and maintained to correct deficiencies and reduce or eliminate vulnerabilities, with owners and due dates.
- Controls are monitored on an ongoing basis to ensure continued effectiveness between assessments.
- System security plans (SSPs) describing system boundaries, environments, control implementation, and connections are maintained and kept current.

How BVTech Implements This

Executed through the annual self-assessment workbook (BVT-CMP-132), the POA&M template (BVT-CMP-131), and continuous posture snapshots in the OpsPilot portal.

Roles & Responsibilities

- Managing Partner - owns this policy, approves exceptions in writing, and reviews it annually.
- Technicians and administrators - implement and maintain the controls in the systems they manage.
- All personnel - comply with the statements above and report suspected violations immediately.

Exceptions & Enforcement

Exceptions require a written, time-boxed waiver from the Managing Partner recorded in the risk register. Violations may result in discipline up to termination and, for contractors, termination of engagement. This policy is reviewed annually and upon material change.
