

SECURITY STANDARDS

Logging & Monitoring Standard

What gets logged, how long it lives, and what pages a human.

Document ID	BVT-STD-242
Version	1.0
Effective date	July 28, 2026
Document owner	Jordan Polasek, Managing Partner
Classification	Internal - BVTech LLC Confidential
Review cycle	Annual, or upon material change

Standard

1. Sources

Identity platforms, endpoints (EDR), firewalls, servers, backup jobs, and the OpsPilot portal audit log.

2. Retention

Security logs retained a minimum of 12 months; incident-relevant logs preserved for the life of the matter.

3. Time

All sources synchronize to authoritative NTP so timelines correlate.

4. Alerting

Severity definitions route alerts: critical pages on-call immediately; high within 1 hour; the daily digest sweeps the rest.

5. Review

Weekly triage of security events; monthly metric review in the portal; findings feed the POA&M.

Compliance

Deviations require a written exception (BVT-FRM-267) with compensating controls and an expiration date. This standard is reviewed annually.
