

SECURITY STANDARDS

Secure Configuration Baseline Standard

The default state of every managed device - deviation is an exception with an owner.

Document ID	BVT-STD-244
Version	1.0
Effective date	July 28, 2026
Document owner	Jordan Polasek, Managing Partner
Classification	Internal - BVTech LLC Confidential
Review cycle	Annual, or upon material change

Standard

1. Workstations

Encrypted disk, standard-user daily accounts, EDR, screen lock, current OS, RMM-enrolled, hardening template applied.

2. Servers

Role-minimal installs, patched, monitored, backed up, admin access via named accounts, RDP never exposed to the internet.

3. Network devices

Unique credentials, current firmware, config backups, management on a dedicated VLAN, logging enabled.

4. SaaS tenants

MFA enforced, audit logs on, least-privilege roles, external sharing scoped, offboarding integrated.

5. Exceptions

Any deviation is documented in the risk register with a compensating control and review date.

Compliance

Deviations require a written exception (BVT-FRM-267) with compensating controls and an expiration date. This standard is reviewed annually.
