

SECURITY STANDARDS

Data Classification & Handling Standard

Four classes, unambiguous handling - so 'sensitive' stops being a vibe.

Document ID	BVT-STD-245
Version	1.0
Effective date	July 28, 2026
Document owner	Jordan Polasek, Managing Partner
Classification	Internal - BVTech LLC Confidential
Review cycle	Annual, or upon material change

Standard

1. Public

Approved for release (marketing, published posts). No handling restrictions.

2. Internal

Business information not for release (procedures, pricing). Company systems only.

3. Confidential

Client business data, contracts, credentials metadata. Encrypted at rest and in transit; need-to-know access; portal-based sharing.

4. Restricted

Regulated data: PHI, taxpayer data, card data, credentials. All Confidential controls plus logging, minimal copies, named access, and certified destruction.

5. Labeling

Documents carry their class in the footer; systems inherit the highest class they store.

Compliance

Deviations require a written exception (BVT-FRM-267) with compensating controls and an expiration date. This standard is reviewed annually.
