

SECURITY AWARENESS ONE-PAGERS

Security Awareness - Passwords & MFA

Long beats complex, unique beats clever, MFA beats both.

Document ID	BVT-TRN-251

Review cycle	Annual, or upon material change

What To Know

- Length is strength: a 4-word passphrase beats P@ssw0rd! every time.
- One account, one password - reuse is how one breach becomes ten.
- The password manager remembers so you don't have to; use it for everything.
- MFA prompts you didn't trigger are attacks: deny and report, never approve to make it stop.
- Never share a code with anyone - no legitimate caller will ever ask.

One Habit

When anything feels off - an email, a call, a prompt, a device - report it immediately and without embarrassment. Early reports are how small events stay small. Reporting channel: your helpdesk ticket portal or help@bvtech.org.
