

SECURITY AWARENESS ONE-PAGERS

Security Awareness - Ransomware Basics

How it gets in, what it looks like, and the first five minutes.

Document ID	BVT-TRN-252
Version	1.0
Effective date	July 28, 2026
Document owner	Jordan Polasek, Managing Partner
Classification	Internal - BVTech LLC Confidential
Review cycle	Annual, or upon material change

What To Know

- It arrives like any phish - one enabled macro or fake update is enough.
- Mass file renames, weird extensions, or a ransom note mean disconnect from the network - don't shut down, don't 'fix' it.
- Call the helpdesk immediately; minutes decide how far it spreads.
- Backups are the antidote - which is why attackers hunt them; ours are tested and offsite.
- Never negotiate or pay on your own; that decision involves counsel, carrier, and leadership.

One Habit

When anything feels off - an email, a call, a prompt, a device - report it immediately and without embarrassment. Early reports are how small events stay small. Reporting channel: your helpdesk ticket portal or help@bvtech.org.
