

## SECURITY AWARENESS ONE-PAGERS

# Security Awareness - Safe Browsing & Downloads

The web habits that keep malware out of the building.

|                |                                    |
|----------------|------------------------------------|
| Document ID    | BVT-TRN-255                        |
| Version        | 1.0                                |
| Effective date | July 28, 2026                      |
| Document owner | Jordan Polasek, Managing Partner   |
| Classification | Internal - BVTech LLC Confidential |
| Review cycle   | Annual, or upon material change    |

## What To Know

- Download software only from vendor sites or the company portal - 'free download' aggregators bundle malware.
- Fake browser updates and 'your PC is infected' popups install exactly what they claim to fix - close and report.
- Search-ad results can impersonate real vendors; type known addresses or use bookmarks for sensitive logins.
- Extensions are software with full page access - install only what's approved.
- The padlock means encrypted, not honest - phishing sites use HTTPS too.

## One Habit

When anything feels off - an email, a call, a prompt, a device - report it immediately and without embarrassment. Early reports are how small events stay small. Reporting channel: your helpdesk ticket portal or [help@bvtech.org](mailto:help@bvtech.org).
