

SECURITY AWARENESS ONE-PAGERS

Security Awareness - Handling Sensitive Data

Classification in practice: what goes where, and what never leaves.

Document ID	BVT-TRN-259
Version	1.0
Effective date	July 28, 2026
Document owner	Jordan Polasek, Managing Partner
Classification	Internal - BVTech LLC Confidential
Review cycle	Annual, or upon material change

What To Know

- Know your classes: Public, Internal, Confidential, Restricted - when unsure, treat it one class higher.
- Client data moves through the portal or encrypted email - never personal accounts or USB sticks.
- Restricted data (PHI, taxpayer, card, credentials) gets logged access and minimal copies.
- Paper counts: sensitive printouts live in locked drawers and die in the shredder.
- Deleting isn't destroying - certified sanitization handles retired media.

One Habit

When anything feels off - an email, a call, a prompt, a device - report it immediately and without embarrassment. Early reports are how small events stay small. Reporting channel: your helpdesk ticket portal or help@bvtech.org.
