

SECURITY AWARENESS ONE-PAGERS

Security Awareness - Reporting Security Incidents

The no-blame rule that makes everything else work.

Document owner	Jordan Polasek, Managing Partner
Classification	Internal - BVTech LLC Confidential
Review cycle	Annual, or upon material change

What To Know

- If something feels wrong, report it - clicked links, odd prompts, missing devices, weird account behavior.
- Speed beats certainty: an early false alarm is free; a late real one is expensive.
- Reporting a mistake you made is protected here - hiding one isn't.
- Know the channel: helpdesk ticket, the security email, or a human - whatever is fastest right now.
- After reporting, preserve: don't delete emails, reinstall, or 'clean up' - evidence helps everyone.

One Habit

When anything feels off - an email, a call, a prompt, a device - report it immediately and without embarrassment. Early reports are how small events stay small. Reporting channel: your helpdesk ticket portal or help@bvtech.org.
