

## TEXAS LEGAL &amp; REGULATORY

## Electronic Signature & Records Policy (UETA / E-SIGN)

How BVTech executes and retains agreements electronically so they hold up: consent, attribution, integrity, and retention under Texas UETA and E-SIGN.

|                |                                    |
|----------------|------------------------------------|
| Document ID    | BVT-TXL-211                        |

| Review cycle   | Annual, or upon material change    |

### Policy

#### 1. Validity

BVTech conducts transactions electronically. Under Tex. Bus. & Com. Code ch. 322 and 15 U.S.C. ch. 96, a record or signature may not be denied legal effect solely because it is electronic.

#### 2. Consent

Counterparties demonstrate consent to transact electronically by executing electronically; consumer-facing flows present the required E-SIGN disclosures.

#### 3. Attribution

Signatures are attributed through authenticated portal sessions, verified email, or commercial e-sign platforms that capture signer identity, timestamp, and IP.

#### 4. Integrity & audit trail

Executed documents are stored read-only with their audit certificates; alterations after execution void the stored copy and require re-execution.

#### 5. Retention

Executed agreements are retained for the life of the relationship plus six years, satisfying UETA's retention-by-accurate-reproduction standard.
