

Client Offboarding & Data Return Checklist

Professional, complete, and secure client transitions

Document ID: BVT-OPS-025

Version: 1.0

Issued: July 02, 2026

Effective Date: _____

Pre-Offboarding

- Confirm termination effective date and final billing in writing; check for unpaid balances.
- Identify successor IT provider and authorized recipient for credentials/data (written client authorization required — BVT-OPS-030).
- Inventory everything BVTech manages: licenses in BVTech tenancy, backup data, domains/DNS, tooling agents, documentation.

Transition Actions

- Export and deliver documentation: asset inventory, network docs, credential list (secure transfer only — never email plaintext).
- Transfer or release: domain/DNS control, M365 partner relationship (remove GDAP/delegated admin), vendor accounts, warranties.
- Coordinate license transitions: move BVTech-billed subscriptions to client or successor billing before cutoff to avoid service loss.
- Provide final backup export or agreed retention window for backup data (default retention after offboarding: 30 days, then destruction).
- Schedule agent removal date; do not remove security tooling before successor coverage is active without written client acknowledgment.

Security Closeout

- Remove BVTech admin accounts and API keys from client systems on the cutover date.
- Revoke BVTech staff access in vault; rotate any shared secrets before handoff.
- Remove client from monitoring/alerting; archive PSA/documentation per retention policy.
- Send written offboarding completion summary listing everything transferred, removed, and retained (and destruction date).

Item	Transferred To	Date	By
Documentation package			
Credentials			
DNS / domain control			
M365 delegated admin removed			
Backup data disposition			
Agents removed			

IN WITNESS WHEREOF, the parties have executed this document as of the Effective Date.
