

Physical Security Policy

Facilities, equipment, and media protection (PR.AA-06, PR.DS)

Document ID: BVT-POL-040

Version: 1.0

Issued: July 02, 2026

Effective Date: _____

Purpose, Scope, and Authority

This policy is part of the BVTech Written Information Security Program, aligned to the NIST Cybersecurity Framework (CSF) 2.0. It applies to all BVTech LLC personnel, contractors, systems, and, where adopted by a client, the client's covered environment. The Managing Partner (or designated security officer) owns this policy, reviews it at least annually, and approves exceptions in writing. Violations may result in disciplinary action up to termination of employment or contract.

Exception process: submit written request describing the business need, compensating controls, and duration. Exceptions expire after 12 months unless renewed. NIST CSF 2.0 references shown per section (GV, ID, PR, DE, RS, RC).

Facilities and Work Areas

- Server/network equipment resides in locked rooms or cabinets with access limited to authorized personnel; access changes are documented.
- Visitors in areas containing client data or infrastructure are escorted.
- Clean-desk for Restricted materials; screens lock automatically; privacy is maintained when working in public spaces.
- Home offices used for client work must provide reasonable physical protection of devices and printed materials.

Equipment and Media

- Company devices are asset-tagged and inventoried in RMM; laptops are encrypted so theft is a hardware loss, not a data breach (see Encryption Policy).
- Decommissioned drives and devices are cryptographically erased or physically destroyed with a disposal record (date, asset, method, by whom).
- Client equipment in BVTech custody (repairs, staging) is logged in/out and stored securely.
- Backup media and keys are protected as Restricted data.

Environmental

- UPS protection for servers and core network gear; surge protection at minimum for edge equipment.
- Equipment rooms are kept within vendor temperature specs; water/heat risks are noted in site documentation.
