

Security Awareness & Training Policy

Human-layer defense requirements (PR.AT)

Document ID: BVT-POL-043

Version: 1.0

Issued: July 02, 2026

Effective Date: _____

Purpose, Scope, and Authority

This policy is part of the BVTech Written Information Security Program, aligned to the NIST Cybersecurity Framework (CSF) 2.0. It applies to all BVTech LLC personnel, contractors, systems, and, where adopted by a client, the client's covered environment. The Managing Partner (or designated security officer) owns this policy, reviews it at least annually, and approves exceptions in writing. Violations may result in disciplinary action up to termination of employment or contract.

Exception process: submit written request describing the business need, compensating controls, and duration. Exceptions expire after 12 months unless renewed. NIST CSF 2.0 references shown per section (GV, ID, PR, DE, RS, RC).

Training Requirements

- New personnel: security onboarding within 10 days of start (policies, phishing, data handling, incident reporting).
- All personnel: awareness training at least annually plus short monthly/quarterly refreshers.
- Role-based training: engineers receive secure-configuration and privileged-access training; anyone handling payments receives BEC/fraud training.
- Phishing simulations run periodically; results drive coaching-first remediation (extra training, not punishment, for first offenses).

Core Behaviors Trained

- Recognize and report phishing, vishing, and pretexting; when in doubt, report.
- Verify unusual requests out-of-band, especially payment and credential requests.
- Use the password manager and MFA correctly; never approve unexpected MFA prompts.
- Handle data per its classification; lock screens; protect devices.
- Report incidents and near-misses immediately — fast reporting is rewarded, never penalized.

Records

Completion records, simulation metrics, and remedial-training records are retained three (3) years and summarized in program reviews and client QBRs where contracted.
