

Business Continuity Plan (BCP) Template

Keeping the business operating while technology is recovered

Document ID: BVT-IRP-050

Version: 1.0

Issued: July 02, 2026

Effective Date: _____

Organization: _____

Plan Owner: _____

Last Updated: _____

Last Exercised: _____

Business Impact Analysis Summary

Business Function	Owner	Max Tolerable Downtime	Depends On (systems/people/vendors)	Manual Workaround

Continuity Strategies

- People: remote-work capability for all office roles; cross-training so no critical task has a single point of failure; emergency contact tree maintained below.
- Workplace: alternate work location or work-from-home activation; mail/shipping redirection procedure.
- Technology: per the DR Plan (BVT-IRP-049); minimum viable toolkit for Day 1 = communications (phone/email), payment processing, and customer service channel.
- Vendors: secondary suppliers identified for critical single-source vendors; key contracts and contacts stored accessibly offline.
- Finance: emergency spending authority: \$ _____ approved by _____; insurance policy numbers and broker contact stored with this plan.

Emergency Communication Tree

Order	Role / Name	Mobile	Backup Contact
1			
2			
3			
4			

First 24 Hours Checklist

- 1 Account for personnel safety; activate communication tree.
- 2 Declare disaster (if warranted) and activate DR Plan with BVTech.

- 3 Stand up the incident bridge; assign a single external-communications owner.
- 4 Notify insurance carrier and document damage (photos, inventory).
- 5 Communicate to customers: status, impact, expected timeline — honest and brief.
- 6 Begin manual workarounds for critical functions per the BIA table.
- 7 Set operating rhythm: status meetings every _____ hours until stable.

Return to Normal

Criteria to stand down: Tier 1–2 systems validated, backlog processing plan in place, and staff returned to standard locations. Conduct a post-event review within ten (10) business days and update this plan.
