

Service Level Agreement (SLA)

Response, resolution, availability targets, and service credits

Document ID: BVT-LGL-003

Version: 1.0

Issued: July 02, 2026

Effective Date: _____

Purpose and Scope

This SLA defines service targets for managed services delivered by BVTech LLC under the Managed IT Services Agreement. It applies only to the Covered Environment and only while Client's account is in good standing.

Hours of Coverage

Coverage	Definition
Business Hours	Monday–Friday, 8:00 AM–6:00 PM Central Time, excluding federal holidays
After-Hours (if contracted)	All other times; emergency response for Priority 1 incidents only unless otherwise stated
Monitoring	24×7 automated monitoring and alerting for covered systems

Priority Definitions and Response Targets

Priority	Definition	Response Target	Resolution Target*
P1 — Critical	Business-wide outage; security incident in progress; server or site down; no workaround	30 minutes	4 business hours
P2 — High	Major function impaired for multiple users; degraded critical service; workaround exists	1 business hour	8 business hours
P3 — Normal	Single user impaired; non-critical service issue	4 business hours	3 business days
P4 — Low	Requests, questions, scheduled changes, minor annoyances	8 business hours	5 business days / as scheduled

*Resolution targets are good-faith objectives, not guarantees; resolution of issues dependent on third-party vendors (ISPs, software publishers, hardware warranty) is targeted at Provider's diligent management of the vendor. "Response" means a qualified technician has acknowledged the ticket and begun triage.

Escalation Path

- 1 Tier 1 — Help desk technician (initial triage and resolution).
- 2 Tier 2 — Senior engineer (complex issues; engaged if unresolved within 50% of resolution target).
- 3 Tier 3 — Principal engineer / Managing Partner (P1 incidents, systemic issues).
- 4 Client may escalate any ticket by emailing the service desk with "ESCALATE" and the ticket number, or calling the escalation line.

Maintenance Windows

Routine patching occurs during standing windows communicated at onboarding (default: weeknights 10:00 PM–4:00 AM CT and one weekend window monthly). Emergency security maintenance may occur at any time with as much notice as practicable. Planned downtime within announced windows does not count against availability targets.

Service Credits

If Provider misses the P1 or P2 response target in a calendar month for reasons within its control, Client may request a credit within thirty (30) days: 5% of that month's recurring fee per missed P1 response and 2% per missed P2 response, capped at 20% of that month's recurring fee. Credits are Client's sole and exclusive remedy for SLA misses and apply to future invoices. Exclusions: Client-caused delays; force majeure; third-party failures outside Provider's control; issues on devices outside the Covered Environment; and periods of suspension for non-payment.

Reporting

Provider will provide ticket and performance reporting at least quarterly (or monthly upon request) covering ticket volume, response performance, patch compliance, and backup success rates.

IN WITNESS WHEREOF, the parties have executed this document as of the Effective Date.
