

New PC Deployment Runbook

Standardized workstation provisioning checklist

Document ID: BVT-RUN-062

Version: 1.0

Issued: July 02, 2026

Effective Date: _____

Pre-Deployment

- Confirm order matches spec standard (SSD, RAM per role, TPM 2.0, supported Windows version).
- Record asset: serial, model, warranty end date → asset inventory before it touches a desk.
- Confirm user assignment, department template, and required LOB apps from the role matrix.

Build Checklist

- 1 Update firmware/BIOS and enable TPM + Secure Boot.
- 2 Provision OS (Autopilot/imaging per client standard); join Entra/AD per environment.
- 3 Enable BitLocker; VERIFY recovery key escrowed (Entra/vault) before handoff — no exceptions.
- 4 Install RMM agent → verify check-in; EDR agent → verify policy applied; backup agent if in scope.
- 5 Windows fully patched; drivers current via OEM tool; remove OEM bloatware.
- 6 Install standard software stack + role LOB apps; sign in to M365 apps; OneDrive Known Folder Move on.
- 7 Printers/scanners mapped per site doc; VPN profile if applicable.
- 8 Power settings: disable USB selective suspend for dock users; set lock timeout per policy (10 min).
- 9 Local admin: unique per-device credential via LAPS-equivalent; NO shared local admin passwords.

Data Migration (Replacement Devices)

- 1 Verify old device's data is in OneDrive/backup BEFORE wiping anything; check PST files, desktop apps with local data (QuickBooks company files, CAD, etc.), browser bookmarks/passwords (export or confirm synced).
- 2 Migrate application data per app checklist; re-activate licensed software (deactivate on old device where seats are limited).
- 3 Old device: hold powered-off for 14 days (the 'oh no my file' window), then cryptographic erase, record disposal (BVT-POL-040).

Handoff

- 10-minute user orientation: sign-ins verified live, MFA working, printers tested, ticket-submission method shown.
- Deployment checklist attached to ticket; asset record updated to 'deployed' with user and date.
- Follow-up touch at 48 hours — catches the small stuff before it becomes frustration.
