

Security Monitoring Consent & Authorization

Client consent for monitoring, telemetry collection, and automated response

Document ID: BVT-SEC-020

Version: 1.0

Issued: July 02, 2026

Effective Date: _____

Consent

Client consents to Provider's deployment and operation of monitoring and security tooling on the Covered Environment, including RMM agents, EDR sensors, email security gateways, log collectors, and backup agents, and to the collection of associated telemetry (system events, process activity, network metadata, email metadata, and security alerts) for the purposes of service delivery, threat detection, and response.

Employee Notice

Client is responsible for providing any notices to, and obtaining any consents from, its own personnel that applicable law or Client policy requires regarding workplace system monitoring. Provider's tooling monitors business systems, not personal devices, unless Client enrolls personal devices in a BYOD program with user consent.

Automated and Emergency Actions

Client authorizes automated and analyst-initiated protective actions, including quarantine of malicious files, isolation of endpoints exhibiting active-threat behavior, blocking of malicious senders/domains, and forced password resets/session revocations for demonstrably compromised accounts, with prompt notification to Client's designated contact.

Data Handling

Telemetry is processed under the DPA (BVT-LGL-011), retained per tool defaults or the periods in the Audit Logging & Monitoring Policy, and is not sold or used for purposes unrelated to service delivery and security.

IN WITNESS WHEREOF, the parties have executed this document as of the Effective Date.
